# Introduction

On behalf of our management, we would like to express our gratitude for giving us the valuable opportunity to introduce ourselves as FUTURE GROUP OF COMPANIES, established since 2019 along with ISO certification in Quality Management, Environmental Management and Occupational Health & Safety management.

We would also like to introduce our division of Future Metal Industries as our sole factory/manufacturing unit of building metal products and Future Unique Building Material Trading LLC as the sole distributor of the brand FMI and its products. We have carefully positioned highly skilled professionals in each division to coordinate and perform specific duties. Future Group of Companies have been developing fast into the business of MEP and Civil Works, as we pride ourselves for providing quality end to end customer service. We have never compromised on the quality and the services provided to the client. We commit to our client's satisfaction by providing them full on-time competent services of our products with a very competitive price.

## Vision

FUTURE GROUP OF COMPANIES aims to become the number one company for the supply of a wide range of good quality products with a focus on prompt deliveries and extended services. We aim to reach this position by anticipating and meeting rapidly growing market requirements, while keeping pace with technological advances and conforming to high quality standards.

## Mission

Our mission is to provide you with the highest-quality products and services possible in a timely fashion and at a competitive price. We work to establish long term relationships with our valued clients in a continuous effort to offer them the utmost level of services.

## Values

Our business model is based on "U" attitude, customer come first. We deliver according to our customer's needs and that is why our customer's simply satisfy the way of doing business. We respect every individual associated with us for buying and selling. Therefore honesty, integrity and respect for individuals are our core values that transform into our strengths:

- High Quality Products
- Customization
- Competitive prices
- Excellent after Sales Service

# Cable Management System

## Cable Tray & Accessories

A Cable Tray System is an assembly of metallic cable tray sections and accessories, that forms a rigid structural system to support cables. FMI Cable Tray are manufactured in accordance of BS EN 61537:2002. Cable Trays are design by taking care of cable loads and practical site problems. Wherever possible fitting are made of state of art single piece construction. Slotting in patterns are such a way that it enables the easy cutting and joining at any point without drilling at site. Design allows greater cable filling capacity and smooth turning at bends. Our ladder systems are design to utilize space and for optimum cable protection.

## Cable Ladder & Accessories

Cable Ladder systems are complete and include all accessories such as bends, t-pieces, risers & etc. Like most of our equipment, our cable ladders can be supplied painted, pre-galvanized, hot dip galvanized, stainless steel, aluminium.

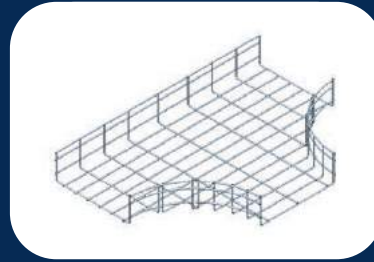

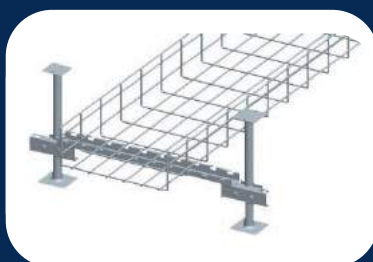

## Cable Trunking & Accessories

Cable Trunkings too are design to ensure easy installation and are available in standard lengths of 3 metre adhering to BS 4678: Part 1971 :1. Trunking covers are equipped with jet locks & screw locks also. Jet lock covers require minimum rotation to fasten itself strongly. Trunkings are being manufactured to BS EN 10143:1999 (BS 2989) & BS EN 10327:2004. Trunkings can also be provided with custom designed finishes. The company offers different finishes, lengths and sizes to suit all requirement.

## Cable Basket Trays

Cable Basket Trays get their name from the fact that they look like long baskets made of wire. Basket trays can be mounted along walls, suspended from the ceiling, and even run below raised flooring that's often found in data centers and other facilities. Their "open" structure allow air to easily flow through and ensures that cables stay well-ventilated and cool, preventing heat related malfunction. Typically, they're made of steel, and come in different finishes, including powder coat and zinc plating.

## C Channel Strut System & Fittings

Metal Framing System provide an economical solution for electrical, mechanical and industrial supports with a wide variety of application in the construction industry. Applications: Pipe & Conduits Supports - Tunnel Pipes - Stanchions - Racks & Shelvings - Wall Framings.

## Cable Management Sports

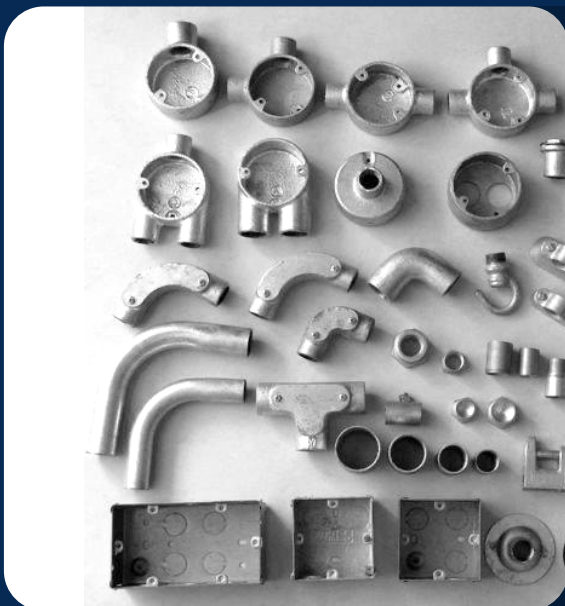

Cable Support System are well designed to provide support for cable trays, cable ladders and trunkings. Cable support are manufactured according to common standard high quality raw materials.

## GI Conduits and Accessories

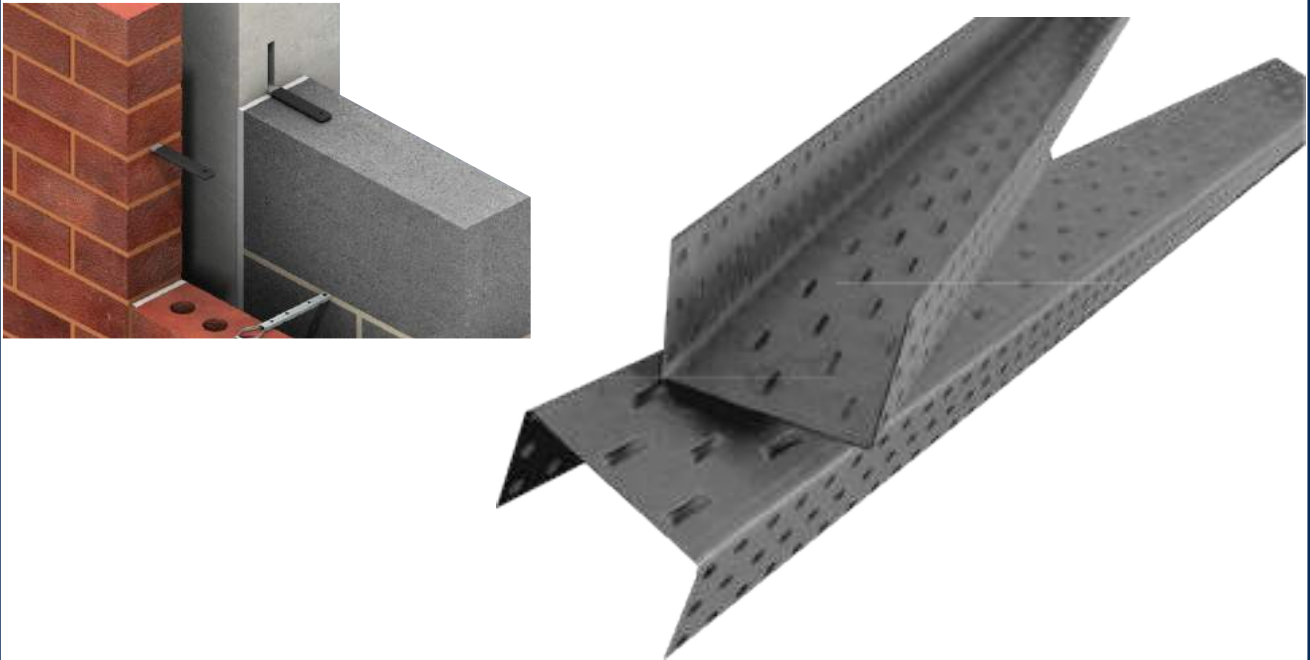

- Rigid Steel conduits to Class 3 electrogalvanized and Class 4 hot dipped galvanized to BS 4568/BS 31
- Malleable junction boxes and Fittings for rigid Steel conduits
- Flexible Steel conduits including PVC coated conduits to BS 731, Low Fire
- Hazard (LFH) coated conduits, Braided conduits, Liquid Tight PVC coated conduits
- Fittings for various flexible STEEL conduits

## Steel Lintel & Blockwork Accessories

FMI steel Lintel is a range of lightweight, easy to install, high load bearing, hot dipped galvanized ribbed steel lintels for use with brick construction in the building industry; specifically designed to support brickwork above window and door openings in replacement to conventional concrete lintel. All Lintels are manufactured using galvanized steel or stainless steel. Upon customer request, steel lintels can be coated with black coat epoxy paint which provides excellent long-term corrosion resistance.
